

I'm Dreaming of a

Green Christmas

Use LED lights instead of standard holiday lights.

Set up Christmas tree and light timers both inside and out to help preserve energy.

Use recycled paper or reuse wrapping paper and bags to wrap presents.

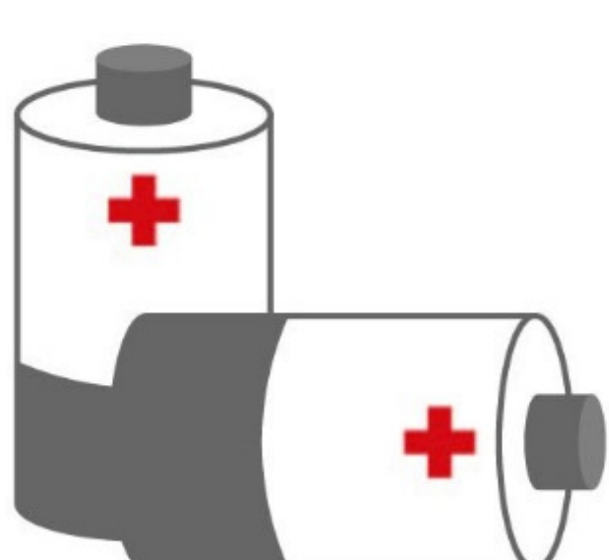

Send eco-friendly, plantable holiday cards.

Purchase an eco-friendly potted Christmas tree. The trees will produce more oxygen.

Shop locally to save on gas (and to support local businesses!)

Collect items from nature and use them as decorative pieces.

Avoid gifts that require batteries.
